PUMP SPECIFICATIONS:

Type/Model: Solids handling/Cornell Redi Prime

Volute: Cast iron ASTM A48 class 30

Flanges: 6" suction, 6" discharge

Impeller: Non-clogging, balanced, 2 vane, 10.09" diameter, enclosed

Solids: Handles 3" diameter compressible, spherical solids

PRIME³ Priming System: Automatic priming system that features a 50 cfm water tolerant, diaphragm vacuum pump driven by the main drive shaft. Our major competitors use a 15 cfm compressor pump with a small compressor venturi that can easily clog. The air/water separator is a simple, reliable float that opens and closes a rubber plunger as water rises and falls. A non return valve isolates the pump during priming and protects against back flow

Wear Rings: Replaceable (Double wear rings available)

Seal: Cornell's patented Cycloseal® design with Run-Dry oil lubrication system. John Crane T-2 single mechanical seal with Viton® elastomers, stainless steel hardware and tungsten- vs. silicon carbide seal faces for abrasion resistance

Discharge Valve: Val-matic or equal

Shaft Sleeve: Heat treated 416 stainless steel

Bearings: Heavy duty, grease lubricated, deep groove ball bearings, with a minimum of 50,000 hours bearing life

PT6TPA-E40			Shutoff Head: 121 feet
