

Application Report

Holland Super Silent Pumps Get No Complaints on Conga Street

The Holland PT8TPC Super Silent Pump was approved by the neighbors on Conga Street.

PROJECT APPLICATION

The Conga Street Pump Station Rehabilitation Project was located in a residential neighborhood. Neighbors' concerns over noise disturbance were put to rest once two PT8TPC Super Silent Pumps were put in place. JEA of Jacksonville (electric, water, and wastewater authority) charged their crew with upgrading the pump station and replacing piping and pumps. The Super Silent Pumps worked continuously to bypass the pump station while the new equipment was installed. Holland Pump is one of three approved bypass pumping vendors used by JEA for their Pump Station Rehabilitation Work.
